SECHVEN

Windows & Doors

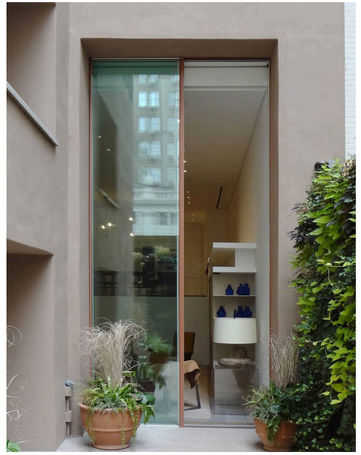

EDI Minimal Aluminium Sliding Systems

SECHVEN was conceived as an idea in 2020. The core vision of this partnership, established by architects and engineers, was to create a company capable of integrating steel, wood, and aluminum materials into cohesive solutions for special projects, offering both design and application under one roof.

In 2019, the partners–drawing on over 30 years of experience in their respective steel-focused companies–secured the representation of SECCO, an iconic Italian brand specializing in steel windows and doors.

To ensure the highest production standards in line with European norms, our company invested in fully automated machinery from Italy and introduced automation software systems from Germany. Our commitment to quality is reflected in our ISO 9001 certification.

Having worked hands-on for 30 years without compromising on quality or aesthetics, the partners now aim to leverage this wealth of experience to enhance customer satisfaction and expand SECHVEN's global reach.

The key strength of our company lies in our ability to work with a wide range of brands. Every project requires unique solutions and details, which is why the best brand or system often varies depending on the specific needs of the project. No single brand excels in every product category, which is why we sometimes combine systems and brands to achieve the best results.

Creativity is essential when working within these options, ensuring that everything functions smoothly. We are always focused on delivering the best outcomes. Our goal is to bring our customers' visions as close to reality as possible.

EDI CLASSIC 30 MINIMAL SLIDING

- 18 mm VERTICAL SECTION
- 6.5 m2 SASH AREA
- 30 mm MAXIMUM GLAZING
- Insect Screen option
- Zero Treshold options
- Textured or satin paint

Edi Minimal is one of the thinnest section sliding system in the world with 18 mm middle andrtical section.

It is designed to close magnificent spaces with incredible thin lines.

It provides a smooth water flow with the sill system that can be completely buried in the ground and the stainless steel water drainage system.

With the ball carrier system, the wings slide on the rails.

If you have a chance to create a parking area in your project, you can completely hide the sashes.

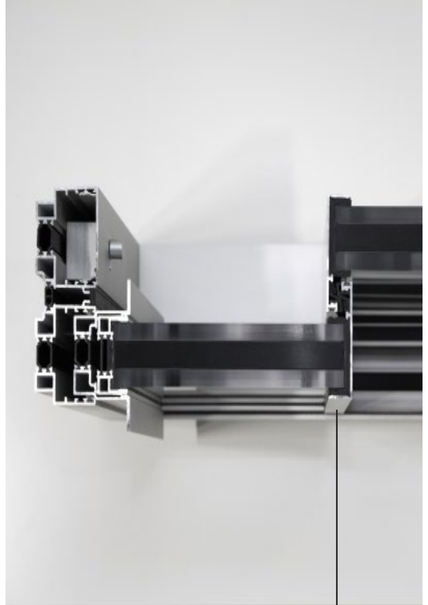

Today, it is one of the most important objects is window and door for modern houses.

WAS EDI CLASSIC 30 MINIMAL SLIDING DOOR

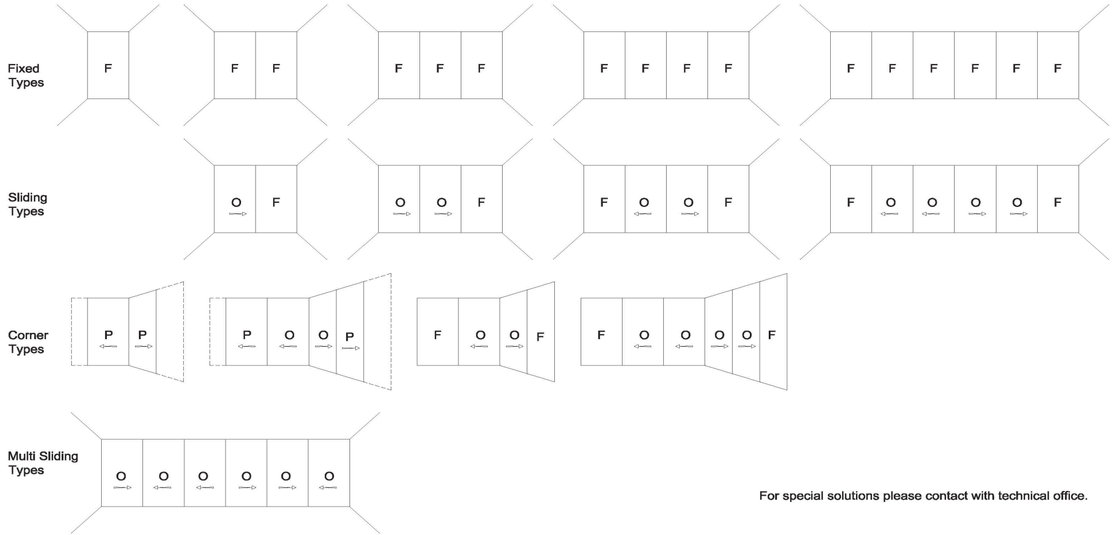

The meaining is bigger glass space and minimal sections with zero treshold.

EDI Minimal Sliding and fix modules

This project offering a magnificent view of the Bosphorus, one of the world's thinnest sliding system profiles and the most minimally divided product designs were implemented. The design features two-panel sliding modules alongside fixed modules. Special heat-insulated glass was selected to reduce UV exposure in the gallery area.
